Exam #1B

Multiple Choice Questions

Instructions: For each of the following questions, select the “best” answer and darken the corresponding oval on your scantron. Good luck!

1. Use interval notation to describe the set

$$\{x : x > 2 \text{ or } x \geq -1\}.$$

- (a) $[-1, \infty)$ (b) $[2, \infty)$ (c) $(2, \infty)$
 (d) $(-1, \infty)$ (e) None of these

2. Use interval notation to describe the set

$$\{x : x > -1 \text{ and } x \geq -2\}.$$

- (a) $(-1, \infty)$ (b) $[-2, -1)$ (c) $[-2, \infty)$
 (d) $(-\infty, -2] \cup (-1, \infty)$ (e) None of these

3. The relation

$$R = \{(1, 3), (1, 4), (3, 5)\}$$

is a function.

- (a) True (b) False

4. Given $f(x) = 2x - 3$ and $g(x) = 7 - 2x$, what is $g(3)$?

- (a) 1 (b) 9 (c) 3
 (d) 0 (e) None of these

5. Given $f(x) = x^2$ and $g(x) = 2 - x$, what is $g(f(5))$?

- (a) 49 (b) 9 (c) -9
 (d) -23 (e) None of these

6. Given $f(x) = 3 - 5x$, what is $f(3 - 2a)$?

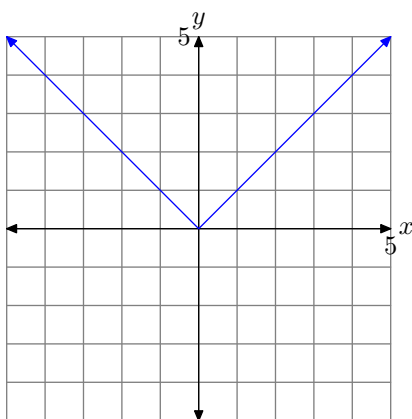

- (a) $18 - 10a$ (b) $-4a + 6$ (c) $(3 - 5x)(3 - 2a)$
 (d) $10a - 12$ (e) None of these

7. Use interval notation to describe the domain of the function defined by

$$f(x) = \sqrt{3 - 2x}.$$

- (a) $[3/2, \infty)$ (b) $(-\infty, 3/2]$ (c) $[2/3, \infty)$
 (d) $(-\infty, 2/3]$ (e) None of these

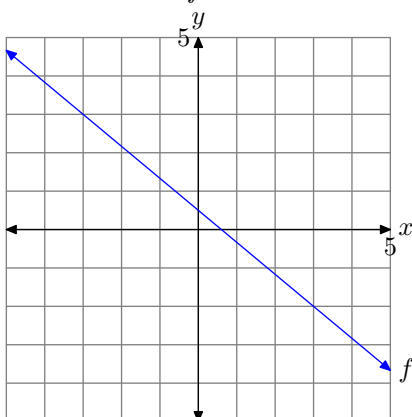

8. Consider the graph of the relation that follows.

The graph pictured above is **not** the graph of a function.

- (a) True (b) False

9. Consider the following graph of the function f .

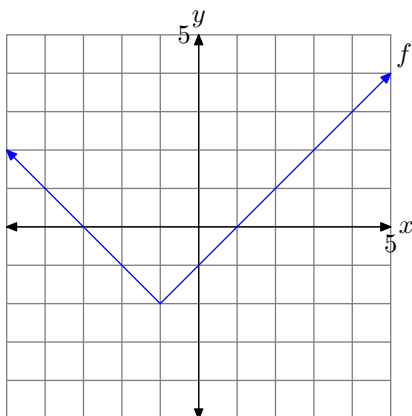

Use the graph of f to determine the value of $f(-3)$.

- (a) -2 (b) 3 (c) -3
 (d) 2 (e) None of these

10. Use the graph of the function in Exercise 9 to determine a solution of $f(x) = -2$.

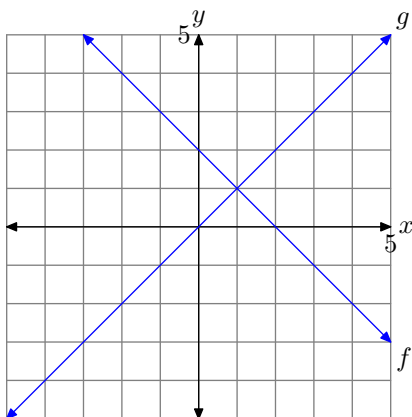

- (a) -2 (b) 3 (c) -3
 (d) 2 (e) None of these

11. Determine the domain of the function pictured below.

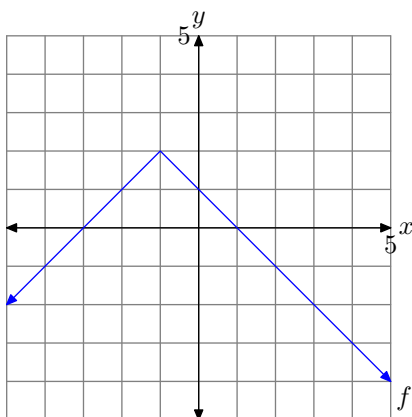

- (a) $(-\infty, -2]$ (b) $[-2, \infty)$ (c) $(-\infty, \infty)$
 (d) $[0, \infty)$ (e) None of these

12. Given the graphs of f and g below, use interval notation to describe the solution of $f(x) > g(x)$.

- (a) $(-\infty, 1]$ (b) $[1, \infty)$ (c) $(-\infty, 1)$
 (d) $(1, \infty)$ (e) None of these

13. Given the graph of f below, use interval notation to describe the solution of $f(x) \leq 0$.

- (a) $(-\infty, -3] \cup [1, \infty)$ (b) $[-3, 1]$ (c) $(-\infty, -3) \cup (1, \infty)$
 (d) $(-3, 1)$ (e) None of these

Instructions. Please place the solution of each of the following questions on your own paper. You must show all supporting work to receive credit for your solution. If you are asked to write a response, grammar, spelling, punctuation, and style are important.

EXERCISE 1. Using hand calculations only, solve the equation

$$C = \frac{32 - 9F}{5}$$

for F .

EXERCISE 2. Using hand calculations only, solve each of the following inequalities for x . Sketch your solution on a number line, then use both set-builder and interval notation to describe your solution set.

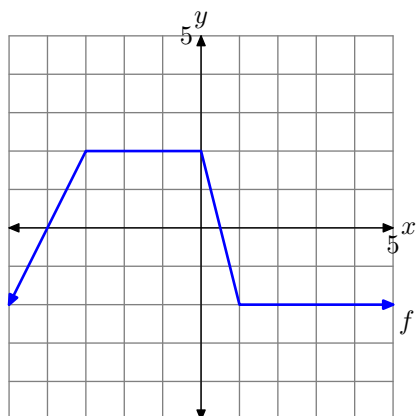

- (a) $3 + 2x \geq 5$ or $4 - 5x < 1$ (b) $-4 \leq x - \frac{2x - 5}{3} \leq 5$

EXERCISE 3. Consider the inequality

$$1.25x^2 - 13.2x - 25.6 \leq 0 \quad (1)$$

- Load the left-hand side of the inequality into your graphing calculator. Adjust the viewing window so that the “turning point” of the parabola is visible in the viewing window as well as both x -intercepts. Make a reasonable copy of this final viewing window on your examination paper. Label and scale each axis with x_{\min} , x_{\max} , y_{\min} , and y_{\max} . Label the graph with its equation.
- Use the **zero** utility in the **CALC** menu to determine the x -intercepts of the graph of the function. Drop dashed vertical lines through each x -intercept, then shade and label the solution of the inequality (1) on the x -axis of your plot.
- Use both set-builder and interval notation to describe your solution set.

EXERCISE 4. Consider the graph of f given below.

For the questions that follow, label and scale each axis, and make sure that all “key points” are accurately plotted. You may use tables if you wish, but they are not required.

- Set up a coordinate system on a sheet of graph paper and sketch the graph of $y = -\frac{1}{2}f(x)$.
- Set up a second coordinate system on a sheet of graph paper and sketch the graph of $y = f(x+2)$.
